THE CAPIX STORY

OUR LAUNCH

Debuting their first helmet collection in 2000, Capix was founded on the objective of providing the best protection available at an affordable price. Armed with one of the most influential pro teams ever assembled, Capix has expanded its product categories to include, not only helmets, but also safety equipment and accessories, spanning four action sports categories: snow, skate, wake and bike.

OUR STANDARDS

As safety is always a choice, we made the choice to make rider safety a priority. By using premium materials and technology we have crafted a full range of protective which meets the highest of international standards. By offering a full line of skate and bike helmets which fully comply with strict CPSC certifications we are certain that our riders' safety; every snow helmet is fully certified with ASTM and every wake helmet with EN1385.

With the input and influence of their world renowned athletes, Capix continues to push the boundaries in an effort to design and build products that stand up to the abuse of today's demands.

In a lifestyle that asks you to 'put your money where your mouth is', it's only wise to cover yourself with Capix.

OUR MISSION

Since the inception of Capix our sights have been set on blending style and safety. For the past decade our riders have worked closely with our R&D, combining the years of experience to perfect all aspects of our protective range to produce an authority in safety and style.

For more info about any Capix product visit: www.CAPIXCO.com

HELMET TECHNOLOGY

HARDSHELL CONSTRUCTION

Hard-shell helmets are the staple of any rider. These tried and tested helmets are built by bonding an EPS liner to an injection moulded ABS shell. Through this process we combine the durability of the ABS or PC shell with the comfort of the EPS liner. The resulting product is strong and resistant to minor knock and scuffs.

IN-MOULD CONSTRUCTION

In-mould is the premium construction for extremely lightweight helmets. Built by fusing an EPS liner to a lightweight poly-carbonate (PC) shell. This produces a low profile, light weight helmet that you will almost forget you're wearing. This style was first made popular by road cyclists who used this outstanding weight reduction to their advantage. Now we are able to bring this technology to half-shell helmets.

HELMET TECHNOLOGY

LOW FIT

Our anatomically designed helmets fit low to the head offering superior protection. A helmet that doesn't fit properly has zero chance of protecting the rider. Our design allows the low profile helmet to cover more of the riders head without blocking vision or impeding movements.

LIKE A GLOVE

The Capix "Like a Glove" fit combines our low fit with the designed liners to combine comfort and fit. Many half shell helmets are very bulky by nature.

EPS FOAM

EPS or expanded polystyrene is the most commonly used lightweight impact foam, reason being is EPS offers the best energy distribution. This foam combines high stability with great flexibility making the perfect helmet liner.

DIALED

Capix helmets are Dialed. We offer each rider several different thickness of fit kits, or comfort pads, with each model. These fit kits allow you to customize the fit of your helmet to your exact preference.

HEAT-SEALED PADS

Heat-Sealed Pads, also known as hot compression pads, are offered in all adult Capix helmets. Using pressure and heat we seal our pads which offers several benefits to the riders. The pads can now be washed without falling apart and they are non-wrinkling so they don't bunch on the riders head.

AERODYNAMIC VENTS

One of the main challenges is heat management in any helmet. We have designed our vents to allow the right amount of air to pass through the helmet. Too much heat exchange and the rider is cold and too little exchange and the result is one wet liner.

SCREENED VENTS

This is a must for any boarder or skier. To prevent any punctures from ski poles, or the like, many of our models offer a screened mesh.

AIRFLOW MANAGEMENT SYSTEM

Our passive ventilation system utilizes channels on the exterior of the EPS liner which will direct airflow between the helmet and your head. This will allow you to stay dry and comfortable all day by removing excess heat and promoting the evaporation of moisture.

3-POINT STRAP SYSTEM

All of our helmets are outfitted with a 3-point adjustable chinstrap. This allows for customization to all head sizes.

MULTI-SIZE

Choosing a size has never been easier. Our multi-size helmets help remove the guess work when selecting the proper fit.

PC SHELL

PC or poly-carbonate shells are strong and highly impact resistant. We use PC shells when building our light weight in-mould helmets to avoid any compromised protection while maintaining a higher standard of style.

ABS SHELL

Simply put this means 'beefy'. ABS shells, or Acrylonitrile Butadiene Styrene, have been used as the staple shell for years. This tried and tested shell will take any abuse you throw its way.

PRO RIDER

Customized with epic graphics, these models are our team rider's choice.

GOGGLE CLIP

You can be sure that regardless of the wipe out your goggles will not go missing. Our newly designed goggle clip ensure that they stay put.

NECK ROLL

This full-coverage, removable and washable liner cradles your neck, creating an unmatched Capix fit.

LOUIE VITO x SPY OPTICS

2008 SIGNALLED A MILESTONE FOR CAPIX WHEN WE TEAMED WITH THE INFLUENTIAL LOUIE VITO FOR OUR MOST SUCCESSFUL RIDER COLLABORATION. THIS YEAR WE HAVE MERGED TWO LARGE FORCES WITHIN THE SNOWBOARD INDUSTRY, WITH SPY BEING ONE OF THE MOST DOMINANT COMPANIES IN THE INDUSTRY AND LOUIE VITO BEING ONE OF THE MOST DOMINANT RIDERS WE HAVE A PERFECT COMBINATION.

ABOUT LOUIE VITO

Yo, my name is Louie Vito. I am 23 years old and have been snowboarding since I was around 6 years old. Started at my home mountain in Ohio called Mad River Mountain. I started day one with my pops and now my whole family snowboards. Pretty cool to be able to go snowboarding with your family. A lot of things inspire my snowboarding. Ridin' with all your friends is one of the biggest. Nothing beats those days. I still look up to some snowboarders too, their style, ideas, I don't think I will ever grow out of being a fan. I look up to my family because they have definitely helped get me to where I am today.

Since the 2009/10 season, things haven't slowed down. IT really snowballed doing Dancing With The Stars, which was so far out of my comfort zone, but I had a lot more fun doing it than I thought. I wanted to go on, be myself, and ultimately bring some new people to snowboarding. I got the chance to go to the Olympics, which has been a goal of mine since I was a kid. I didn't quite get a medal like I was hoping, but I landed my run when it counted and that's all I can really ask. So, I guess I just have to wait till 2014 for the Gold.

I have great sponsors and couldn't be happier. Every person at the companies I ride for are down for snowboarding. I am still planning on doing a lot of contests as the next couple years come but also want to try to start filming more again and do both. If you can, then you get the best of both worlds. I just want to snowboard, have fun, and still push myself to progress every year. If I can do this, then I am "LIVING THE DREAM".

Sponsors: Red Bull, Toyota, 686, LV Snowboards, Nike, Spy, Kicker, Sprint, Grenade, CapiX, UGley, Vestal, Incipio

PAT MILBERRY x SKULLCANDY

IN 2009 PAT JOINED FORCES WITH CAPIX IN CONJUNCTION WITH SKULLCANDY TO CREATE THE ULTIMATE IN FREESTYLE HELMETS. THIS PRO COLLABORATION FEATURES SKULLCANDY HEADPHONES BUILT INTO THE EARPADS OF AN ABS / EPS STYLE HALF-SHELL HELMET. THE SKULLCANDY SPEAKERS COME PRE-INSTALLED IN OUR EARPADS AND THE BEST PART IS THERE IS NO NEED TO WORRY ABOUT COMPATIBILITY OR BUYING A SEPARATE ACCESSORY FOR YOUR AUDIO PLAYER; JUST PLUG IN AND GO.

ABOUT PAT MILBERRY

Born and raised in St. Paul, Minnesota, professional rider Pat Milberry has never done things the "conventional" way. Milberry has earned upwards of 80 published photographs in international snowboarding, music and style based magazines including 3 covers. Along with the photographs, Milberry has filmed yearly video parts with Think Thank for the past 6 movie titles, and is also achieved through the launch of the 1st ever down hillable snowboard podcast series on i-Tunes called So-Gnar TV.

Pat has always been one to give back to snowboarding in any way that he can. Most notably he spent 9 years coaching at Windell's camp in Mt. Hood, Oregon and 6 years ago he launched his own snowboard camps through a tour called The So-Gnar Mighty Midwest Snowboard Camp Tour. This tour is grown exponentially into 14 communities around the U.S. and even visits Japan. "Building the foundations of snowboarding by sharing your talent and experiences with the next generation is what I consider one awesome day," says Milberry. Milberry's passion for the snowboard culture is undeniable and he will continue to innovate through his hard working community based building efforts, his unique approach and creativity he is lucky to be blessed with. Pat's sponsors include Capix Helmets, Skullcandy, Red Bull, Allian Snowboards, S4 Optics, Winter Park Resort, Pow Gloves, Coalbrook Organics, Evol Bueritos, and So-Gnar. [Check Pat's daily updates & doodles at so-gnar.com]

CHANELLE SLADICS x KEEP A BREAST

ONE OF THE BIGGEST MOVEMENTS IN SNOWBOARDING HAS BEEN THE ADVANCEMENT OF THE LADIES PRODUCT. WE FELT THAT IT IS ONLY FITTING TO COMPLIMENT THE BEST LADIES PRODUCT WITH A SIGNATURE MODEL DESIGNED SPECIFICALLY FOR WOMEN. IN 2009 WE PAIRED UP WITH KEEP A BREAST TO PRODUCE THIS SPECIAL COLLABORATION AND WE WERE EVEN MORE THRILLED WITH CHANELLE SIGN ON.

ABOUT CHANELLE SLADICS

Born and raised in Newport Beach, California, Chanelle came out looking for trouble. She started skateboarding and waterskiing at the age of 2, soccer and swim team at 4, and roller hockey at 7. Her daredevil ways did not come without consequence. By the age of 12 she had already broken 7 bones, avoided amputation, and had a plethora of stitches and bruises. Always looking for ways to challenge herself, she took on all sports available to her. She used her birthday money to sign up for lessons at the local mountain, but slipping her 3rd lesson because she was scouted by a brand that paid her entry fee for a slopestyle podium event. Taking 2nd place and walking home with loads of gear, she withdrew from club soccer and joined USASA the following season. Chanelle became the queen weekend warrior and quickly progressed winning a gold medal at the Junior World Championships in New Zealand earning her a spot at X-Games. Fast forward to 2007, she took a Bronze Medal home in her Winter X Games performance and proved herself a worthy opponent. In 2009 Chanelle won the Asian Open, Ladies Open and placed 3rd at Us Open. Chanelle has become a familiar face on the podium and in the magazines. When not competing, she spends her season filming around the world with One Life. Main Sponsors: Oakley, Kicker Audio, Pure Bars, Capix, Nelf, Nixon, Flux, and Breckenridge Resort.

MAINLINE HELMETS

SUPREME

IN OUR SUPREME WE HAVE COMBINED A CLEAN SKATE DESIGN WITH OUR IN-MOLD TECHNOLOGY TO PRODUCE A SUPER LIGHT WEIGHT HELMET WHICH TIPS THE SCALES AT 485G. THIS MODEL WAS BUILT AROUND A LOW-PROFILE FIT AND FEEL WITH ALL OF OUR BELLS AND WHISTLES. WITH AERODYNAMIC VENTS AND A PASSIVE VENTILATION SYSTEM THIS HELMET WILL HELP WITH HEAT MANAGEMENT WHILE THE LOW-PROFILE FIT PROVIDES A DIALED SNUG FIT.

An aerial photograph of a winter forest landscape. The ground is covered in a thick layer of snow, and numerous bare, dark trees are scattered across the terrain. The word "PROTECTION" is written in large, bold, black capital letters in the upper right quadrant. Two horizontal black lines are positioned above and below the text.

PROTECTION

UNDERCOVER KNEE

OUR UNDERCOVER KNEE IS THE PERFECT CHOICE FOR RIDERS LOOKING FOR LIGHT WEIGHT PADS WITHOUT ADDING ANY EXTRA BULK. THESE THICK MULTI-LAYERED NEOPRENE PADS OFFER OPTIMAL FLEXIBILITY AND STRENGTH. OUTFITTED WITH THE LATEST D3O TECHNOLOGY, WHICH UNDER IMPACT CAUSES THE MOLECULES TO LOCK TOGETHER TO ABSORB AND DISPERSE ENERGY. FOR GREATER CUSTOMIZATION WE HAVE ADDED VELCRO CLOSURES TO FIT ANY SIZE. THE D3O INSERTS ARE FULLY REMOVABLE AND THE KNEE PAD ITSELF IS MACHINE WASHABLE.

MODEL NO.	COLORS	SIZES	MATERIAL
H12-UNDRKVRKNEE	BLACK WITH GREY	S / M / L / XL	NEOPRENE, D3O, VELCRO, LYCRA

UNDERCOVER ELBOW

THESE ANATOMICAL ELBOW PADS USE THE SAME D3O TECHNOLOGY FROM OUR KNEE PADS AND INCORPORATES A SLIM LIGHT WEIGHT DESIGN. FEATURING THINK MULTI-LAYERED NEOPRENE FOR OPTIMAL COMFORT AND RANGE OF MOTION AND AN ELASTIC STRAP WITH VELCRO FOR THE BEST CUSTOMIZATION. THE D3O IS FULLY REMOVABLE AND THE NEOPRENE IS MACHINE WASHABLE.

ABOUT D3O TECHNOLOGY

D3O is a state-of-the-art shock absorption and impact protection technology offered in select Capix protective. While normally a soft and flexible material, once impacted D3O molecules lock together to absorb impact and disperse energy drastically reducing transmitted force and minimizing the risk of injury.

MODEL NO.	COLORS	SIZES	MATERIAL
H12-UNDRKVRKNEE	BLACK WITH GREY	S / M / L / XL	NEOPRENE, D3O, VELCRO, LYCRA

WRIST GUARDS

OUR WRIST GUARDS ARE ERGONOMICALLY DESIGNED WITH SPLIT SUPPORT AND FULL WRAP STRAPS. THIS COMBINATION PROVIDES EXCELLENT WRIST SUPPORT WITHOUT COMPROMISING YOUR RANGE OF MOTION. REALIZING THAT ADULTS REQUIRE MORE STRENGTH FROM THEIR SPLINT WE HAVE REINFORCED OUR ADULT SPLINT WITH ALUMINIUM TO HELP ABSORB GREATER IMPACTS. OUR GUARDS ARE LIGHT WEIGHT AND WILL FIT UNDER MITTS OR GLOVES.
