

CLWR[®]
COLOUR WEAR

AUTUMN/WINTER 2015-2016

AUTUMN / WINTER 2015-2016

For 2015/16, the collection is a new and reinvented interpretation of our Scandinavian design and handicraft heritage.

We have built a collection reflecting our strong outdoor legacy blending function and rugged fabrics with a modern, clean and urban influenced look.

For the overall inspiration we have looked at vintage Swedish military and work-wear garments. The way they used cuts and details, fabrics and trims will be seen throughout the collection.

A snowmobile is parked in a snowy field at sunset. The sun is low on the horizon, creating a warm, orange glow. Bare trees are visible in the background. The snowmobile is white and black, with 'Arctic Cat' branding. The overall scene is serene and cold.

EVERY DAY OUT DOOR

#EVERYDAYOUTDOOR

Colour Wear was born as a result of a love for outdoor creative sports such as snowboarding, skiing and skateboarding.

The vision was to create garments for these sports while still keeping the urban feel and fashion influences of Sweden alive in the clothing. Over time passions evolve, not only do the people behind Colour Wear find themselves on the mountain or in the snowpark, but they also run in the city, bike the trails in the forest behind the house, or swim in the ocean close by.

Their lifestyles are “**Everyday Outdoor**”, and as a result so is the clothing line created by CLWR.

A functional, fashionable line which provides the wearer with garments which work in any weather in any location for any outdoor passion.

CLWR is “Everyday Outdoor”

LIBERTY

*Freedom, breaking the boundaries
— that is Liberty.*

*Designed for riders who want to explore the mountain.
Built for the harshest conditions, yet with an unconstrained fit and design which reflects your lifestyle.*

Enjoy your freedom with Liberty.

FUSION

Blending fashion and function FUSION embodies the modern, clean and urban influenced look.

*This is the result of the Colour Wear design and riding team sitting together to create something unique
— the future of outerwear.*

*Using new materials, cuts and trims, the Fusion line blurs the boundaries of
street- and outerwear.*

RIDE

Garments built to ride.

Designed to meet the needs of riders who spend their winter on the hill, in the snowpark or backcountry.

It is where Colour Wear started and it's the roots of the company.

Built and designed for day in day out riding whatever your needs.

URBAN

Blending Scandinavian heritage with modern lifestyle trends.

Urban is inspired by the Swedish fashion scene, taking influences from art, music and modern fashion.

*Unique trims, daring prints and cutting edge silhouettes make the Urban line stand out in a market
where everything else looks the same.*

PLEX FAMILY

When I was growing up I travelled very little. The first time I travelled by plane, I was 17 years and was going snowboarding in the North of Sweden.

It was a great experience for me and my quest for an active lifestyle close to nature, as well as all the travel and adventure is a direct contrasting result of my urban childhood. I now live in a family where we strongly value nature and an active lifestyle. My wife Michaela got me to start skiing seriously in 2004 and now, 10-11 years later, I am really skiing an outrageous amount.

During my stay in Åre during 2005/06, I realised that I could combine my career as an artist and entrepreneur with the lifestyle that comes with skiing and an active life close to nature. Stereotypes should be torn down, shaken and be pressured to change. I'm a rapper, but I ski, I run and swim extreme races and work with food and wine. Of course my colleagues shake their heads at these choices but I do not care. The link to the Colour Wear suits me and my family perfectly because we share the same values and appreciate the same things in life.

CLWR go their own way, they create their own terms and conditions. Just because they create technical clothing, it does not have to look a certain way with a certain shape and colour.

It is the impressions we catch in life that are interesting and the personal painting we choose to create with them. Just because others are colouring in a certain way now does not mean that I also have to do it.

The same way of thinking can be applied to the details. Everything from the colour, shape, materials, feeling and finishing. CLWR and I share a very close philosophy, and we build our cooperation based on these common values. We work in the same direction and we do not let stereotypes and rules hinder us on our path.

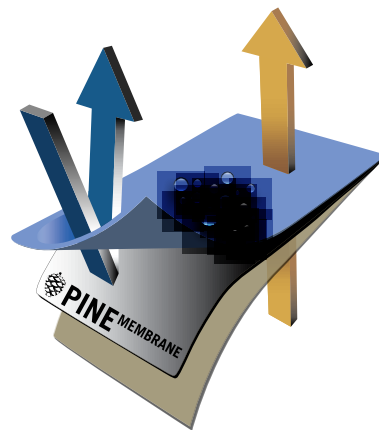

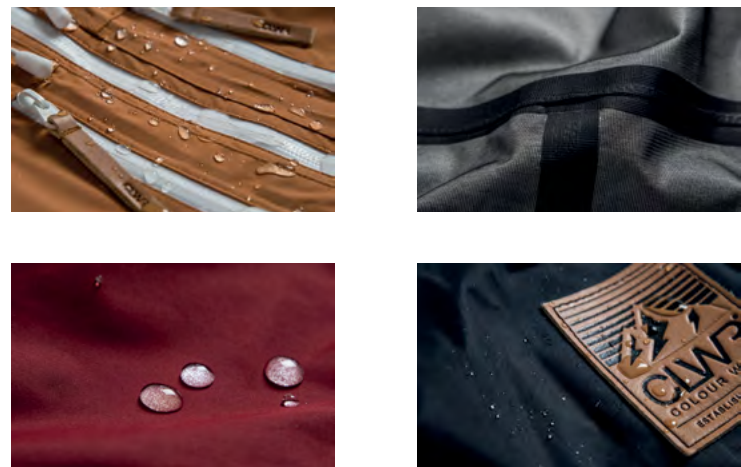

Everyone in my family shares common experiences and adventures.
We include rather than exclude, creating added value for everyone.

PLEX Family By: Colour Wear

Taking inspiration from evergreens, PINETECH was developed to provide the wearer with versatile garment construction which can handle any conditions the winter can throw at them. Featuring a highly waterproof yet breathable laminate membrane, you will stay dry inside and out. Combined with specially selected, high quality and resilient outer shell materials and fully taped seams to provide the extra protection you need from the elements.

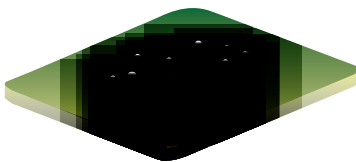

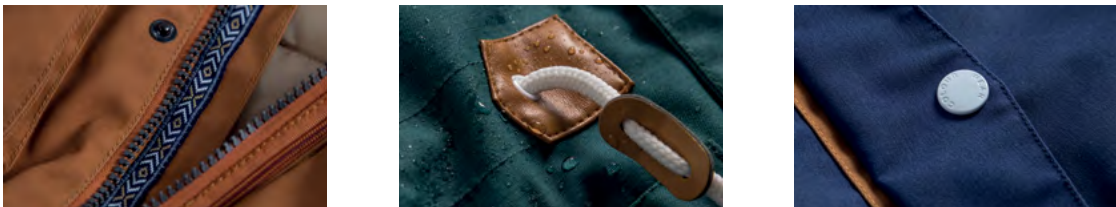

This is our pinnacle performance shell. Combining a highly breathable and waterproof membrane (**20.000 g/m² /24h, 20.000 mm**) with our finest outer shell for ultimate protection in any conditions.

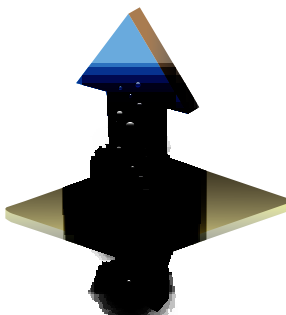

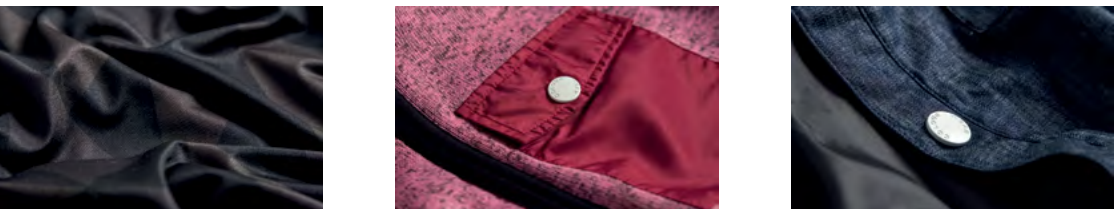

The brushed lining adds an extra level of moisture wicking and comfort. A durable, light weight and comfortable combination for your demanding outdoor needs.

WATER REPELLENT are a special treated fabrics which help provide adequate protection from the rain without losing their soft urban touch and feel. Achieved thanks to a DWR (Durable Water Repellent) shell finish.

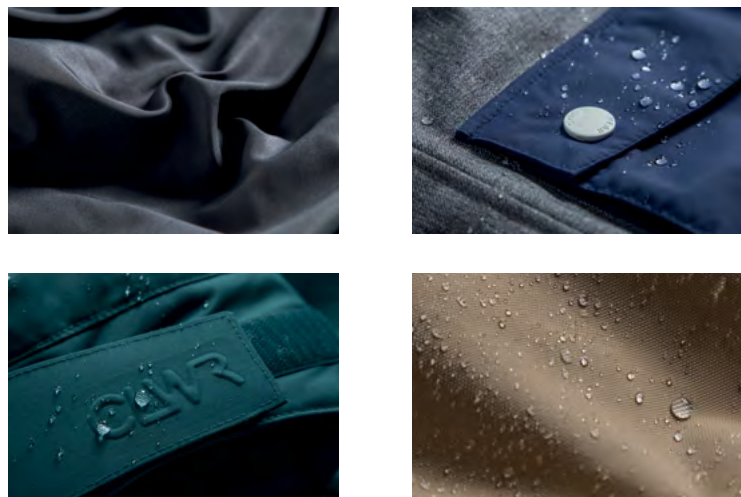

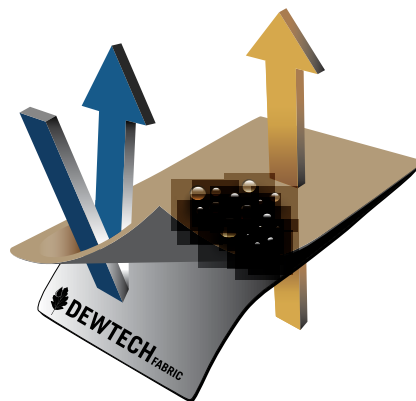

There is nothing worse than layering garments which don't dry fast. Our specially developed SwiftDry fabrics are designed to wick moisture away from the body and dry quickly, preventing you from getting cold or feeling damp. When used as an outer layer in spring conditions, these garments will dry fast in the air while you are moving.

The foundation fabric construction in our outerwear range. Taking inspiration from pearling water on leaves, DEWTECH is constructed with a PU coating on the back and an outer DWR shell finish for solid levels of breathability and waterproofing.

Extra weather resistance is provided by the durable woven outershell fabric and taped seams, and the soft lining adds extra warmth and comfort.

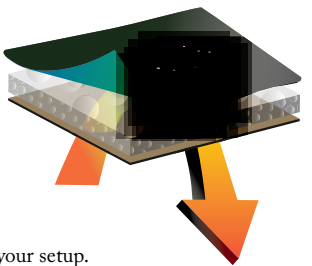

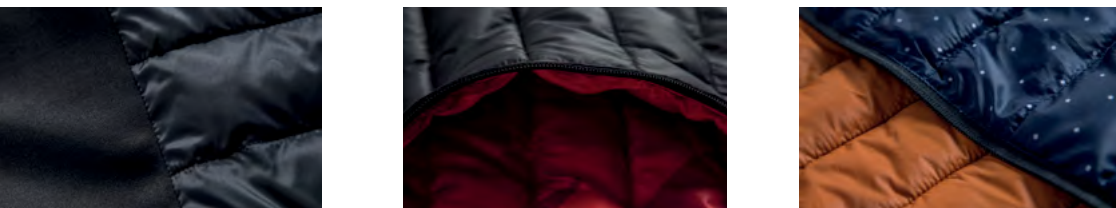

DEWTECH 10 provides the wearer with solid levels of waterproofing, breathability and comfort which most brands only feature in their most expensive garments. Dewtech 10 sets the Colour Wear standard. Stay dry, stay warm and stay comfortable in this 2 Layer durable fabric offering **10.000 g/m² /24h, 10.000 mm** protection.

DEWTECH 5 is used in our crossover garments designed to provide on the mountain protection in urban styling and fit. Featuring above average levels of waterproofing and breathability in comfortable and durable fabric constructions.

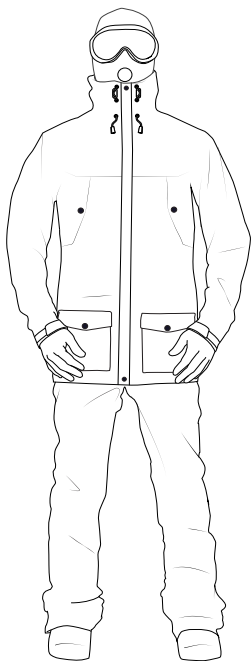

Layering garment for those who want to layer up and adapt to the various conditions on the mountains. These insulated pieces are a must in your riding wardrobe. Regulate your temperature by adding or removing an INSULA piece to your setup.

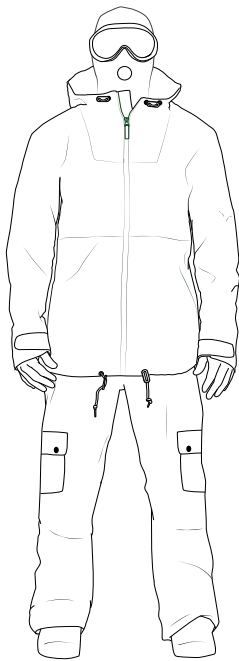

FITS

SYMBOLS

TAILORED FIT

REGULAR FIT

LOOSE FIT

TAILORED FIT:
Clothing cut more to fit the shape of the body, and accentuate the style of the garment. Jackets are fitted slightly at the waist, and sleeves are slimmer than normal. Pants have an ergonomic shape with pinned in knee sections. Heaps of style without restricting mobility and performance.

REGULAR FIT:
This is the tried and trusted fit in the Colour Wear range providing freedom of movement and room for layering without being too oversized.

LOOSE FIT:
The ideal choice for individuals who look for a more relaxed fit in their clothing. Not so much tailoring in the shape, just solid spacious snowwear styles with plenty of room for layering and heaps of on the hill style. For those who like it big and baggy!

YOUTH

Colour Wear designs clothing for the future of our market. What is more future than the youth of today?

We take designs from the adult product lines and shrink them down to youth sizes and cuts, adding essential features which growing kids need for comfort and mobility.

These pieces may be smaller in size but they pack just as much style as their grown up counterparts.

COLOUR WEAR

Founded in 2010 by 3 industry veterans from Sweden, the vision of Colour Wear was to create functional garments using raw fabrics combined with modern details and silhouettes.

Tailored to meet the demands of both the outdoors and innercity life. In other words, creating clothing for “Everyday Outdoor” lifestyles.

Colour Wear's general design strategy is built on the great legacy of modern Scandinavian design. It is a design movement characterised by simplicity, minimalism and functionality.

Our definition of Scandinavian design is that well designed and functional products do not have to be expensive but should be affordable for everyone.
