THAT'S A FEATURE!

MADE IN CANADA

Ohhh Canada Eh!

100% CANADIAN MAPLE

Canadian Maple is a strong and proven material used in the world's best skateboards. We source only the finest veneers found in Eastern Canada.

HOLLOWTECH

Our highest-end construction reduces weight and increases strength by removing unnecessary wood and incorporating pre-cured fiberglass construction.

WET FIBERGLASS

Wet Glass is found between the plies and adds strength as well as a lively 'snappy' flex pattern that won't break down over time.

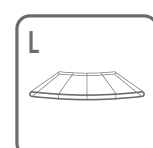

PRE-CURED FIBERGLASS

Fiberglass is a lightweight yet extremely resilient material, used to either add extra stiffness to a solid maple board, or replace some maple plies and provide a snappy flex to a thinner flexy board.

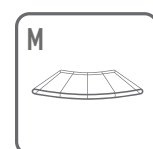

CARBON

The ultimate board construction material, carbon is lightweight but extremely strong, allowing your board to perform at its absolute maximum potential.

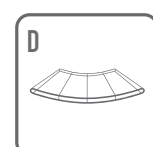

LOW CAVE

Mellow concave that barely feels like it's there, but designed to give you the control you need, when you need it.

MEDIUM CAVE

The perfect middle ground, enough concave that you always feel glued to your board, but not too much to hurt your feet during a longer cruise.

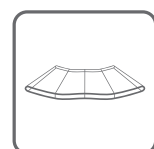

DEEP CAVE

Concave designed to really lock your feet in while adding responsiveness and control.

NO CAVE

Flat standing platform designed to prevent over-leveraging your trucks, providing maximum grip while turning.

W CAVE

W concave adds an extra hump down the middle of the board to support your arches and help keep your toes and heels truly locked in during the most intense riding.

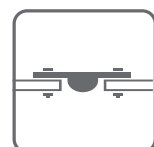

ROCKER

Rocker provides a more comfortable foot platform by adjusting the deck angles to a skater's natural stance. It also adds board control and increases responsiveness under your feet.

DROP DOWN

A lowered foot platform provides the most stable ride and gives your feet pockets to lock into while skating. These boards are also easier for pushing and foot-breaking.

DROP THROUGH

Drop through decks are lower to the ground and enjoy increased stability without sacrificing maneuverability.

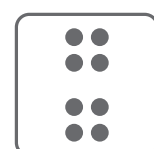

FLUSH MOUNT

Flush mounted decks have recessed truck mounts to ensure the most precise ride and control over your trucks.

SYMMETRICAL

Go both ways with symmetrical board design. Generally found in freeride and downhill decks, these boards allow the rider to skate both regular and switch without changing up their stance.

MULTI WHEELBASE

Precisely dial in your ride with multiple mounting options for your trucks.

SANDED WHEEL WELLS

Wheel wells reduce the risk of wheel-bite by increasing the gap between wheels and deck. Sanded or CNC'd wheel wells both allow for larger wheels or looser trucks, if desired.

CNC WHEEL WELLS

Wheel wells reduce the risk of wheel-bite by increasing the gap between wheels and deck. Sanded or CNC'd wheel wells both allow for larger wheels or looser trucks, if desired.

FENDERS

Also known as pressed wheel wells, flares are part of the board shape. The resulting bumps in the concave on top allow for larger wheels, looser trucks, and provide better control and more precise foot placement.

SOFT TOP GRIP

This grip tape has a layer of foam under its coarse top sheet. This helps hold your foot in place while reducing road vibration and creating a cushy, comfortable ride.

UV REACTIVE

Watch your board come alive when exposed to UV rays. Colors change and minds re-arrange.

EMBOSSSED

Extra layers of ink raise the printing surface and provides a tactile experience. Something to run your hand over while planning your next ride.

KICKTAIL

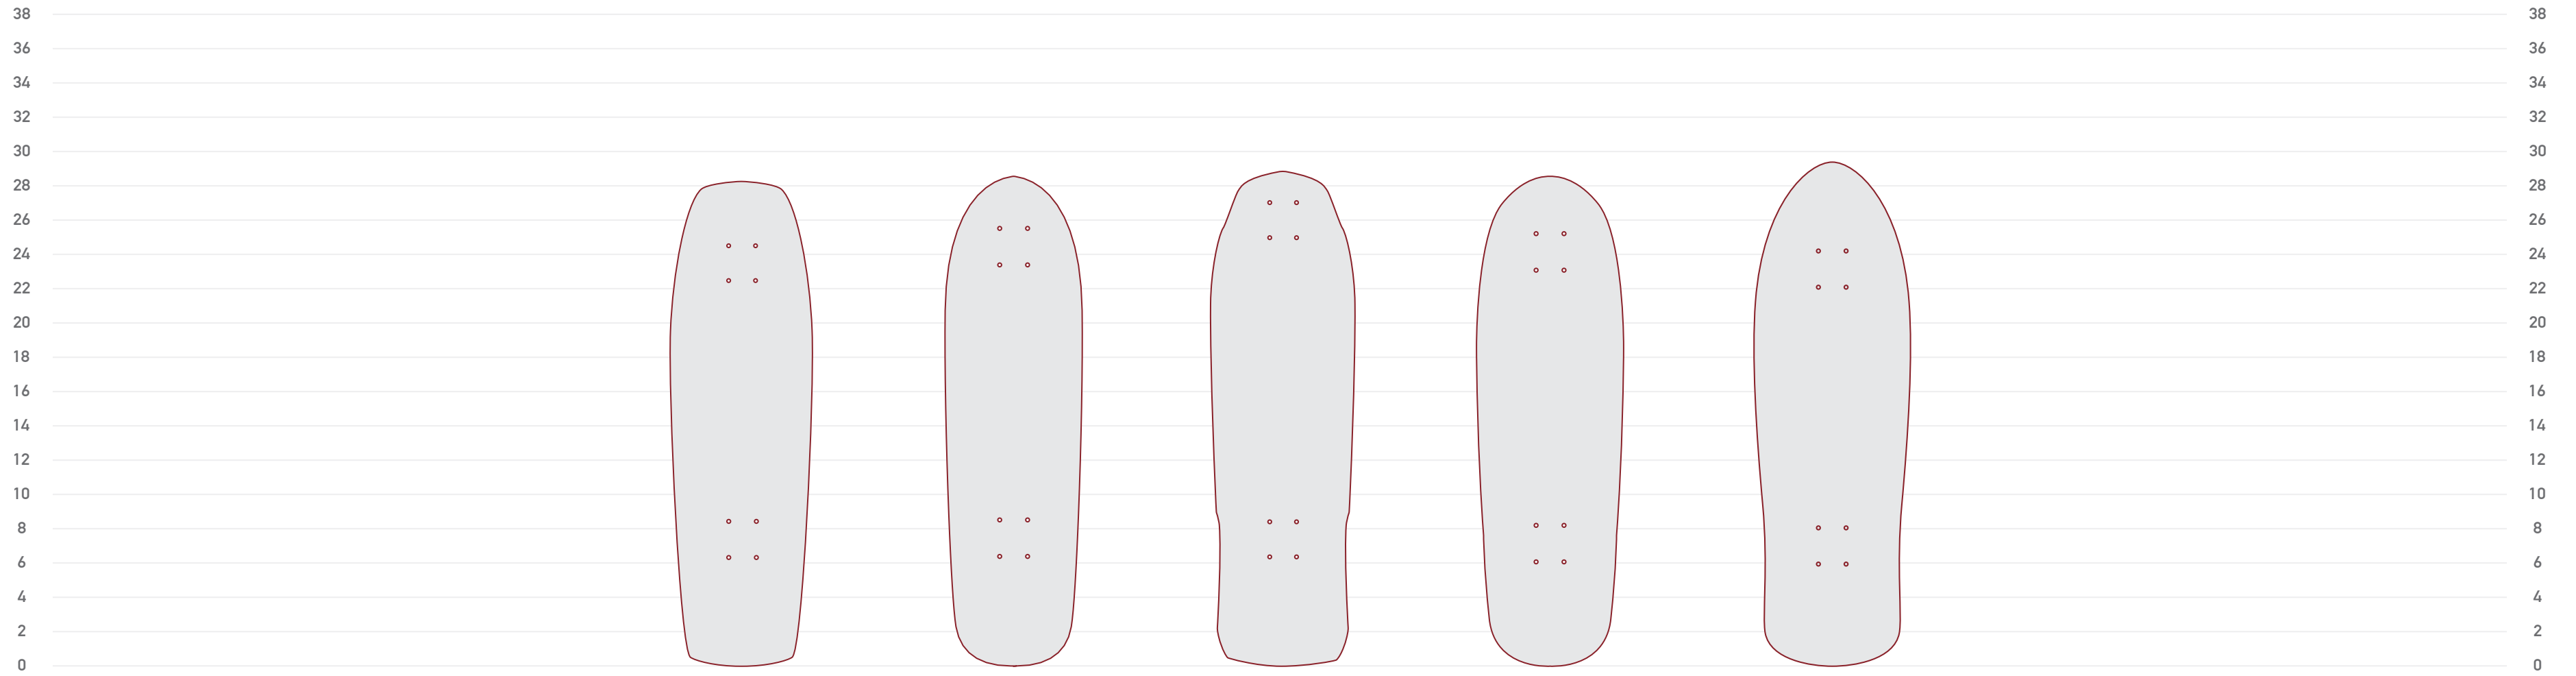

Take your skating into the third dimension with a kicktail. We design our kicktails to work perfectly with each deck shape as well as with the truck and wheel setup on each complete.

SURF SKATE

This set up combines our unique Bear Banger RKP front truck with a Polar Bear 155 in the rear for the ultimate surfy ride.

CRUISERS

PURPOSE-BUILT WITH QUALITY COMPONENTS

Rip around town like never before with one of our compact cruisers. These boards have been purpose-built with quality components and functional shapes to make your next urban adventure epic. Carve a hill, slash a bank, pop up a curb on your way to wherever you have to go. The perfect size for stashing.

- Compact cruisers, designed to skate around the city
- Purpose built with high quality components, soft grippy wheels that roll smooth, quiet, and fast
- Designed to skate with fully functional kicktails
- Perfect for travel, fits carry-on size restrictions, easy to pack, easy to store

ATV

OPENING UP SPOTS YOU WOULDN'T HAVE CONSIDERED

Our ATV Series completes are true jacks-of-all trades. Equally at home in skate parks, at crusty street spots, slashing steep alleyways or ripping to the corner store, these boards are designed as completes to make sure that no inch of pavement is off limits. All variations of our take on street skating, these boards will allow you to explore your style and creativity by opening up spots you wouldn't have considered skating on any other board.

All ATV series boards are built on our Polar Bear 155 trucks and soft, 60mm Chubby Hawgs wheels to give you a responsive, agile ride and the ability to roll over even the roughest ground with ease.

LONGBOARDS

QUALITY THAT YOU WON'T FIND IN ANY OTHER LONGBOARD

The smoothest, most comfortable rides in the lineup, designed to roll over or carve around anything in your path with the perfect amount of feedback and flex. We use technology developed for our Downhill/Freeride line, like rockered standing platforms, fast, grippy wheels, and high performance trucks, to create a feeling of quality that you won't find in any other longboard.

- High quality construction and components
- Race-proven technology from our Downhill/Freeride skateboards
- Rockered platforms for tighter carving and increased comfort
- Designed to accommodate large wheels without the risk of wheel-bite
- Purpose built complete with wheels that grip and roll over bumps, cracks, and debris

SURF SKATES

SLASH AND EXPLORE

Our take on the surf skate genre of boards is a simple, solid design that achieves unbelievable amounts of turn through a unique RKP front truck geometry and extra tall bushings rather than by using extra parts or springs to enhance the turn. This creates a board that gives you the ability to make super tight turns and cutbacks while still inspiring confidence and allowing you to slash and explore more types of terrain.

- Wide, stout carving boards that mimic the feeling of surfing
- New Line for Landyachtz using the new for 2021 130mm Bear Banger Surf trucks
- Built to pump, flow and surf concrete
- All models featuring new for 2021, Hawgs, 65mm, 78a 65mm lipped surf skate wheels

DANCERS

FITS YOUR STYLE

Our light, durable, and stylish dancing boards make smooth footwork and precise freestyle tricks a breeze. In addition to eye-catching graphics, high-performance components, and thoughtful laser-cut grip tape, these boards are now available in multiple sizes to ensure that there's one that fits your style as well as the size of your feet.

- Agile, performance-driven dance shapes
- Gripped nose and tail with an exposed foot-platform for friction free footwork

DH / FREERIDE

MOST INNOVATIVE SKATEBOARDS WE'VE EVER MADE

Designed to conquer steep neighborhoods and big mountain descents around the world, these are some of the most technically advanced boards in the lineup. Informed by 20 years of racing heritage and constantly updated to reflect the demands of modern DH skating, these are the highest quality, fastest, and most innovative downhill boards we've ever made. Features like dropped platforms and variable, technical concave will keep you locked in and stable as you get after it on your local hills.

- Our most technically advanced boards
- 20 years of racing heritage and product development
- Foot platforms designed by engineers and riders to provide maximum performance under demanding circumstances
- Features in this line include: dropped foot platforms, drop mounting, micro drops, multiple wheelbase options, carbon constructions
- Boards flex is designed to provide the perfect amount of feedback and control

RACE

THE HIGHEST LEVEL IN THE TOUGHEST CONDITIONS

Developed as complete racing systems, our Race boards are set up exactly the same way our team skates them and come ready for the racetrack straight out of our Kimberly, BC factory. The boards in this category have been paired with new, purpose-built components in order to perform at the highest level in the toughest conditions. The result is a modern, race-proven, system that meets and exceeds the demands of today's fastest riders.

- High-end racing systems designed and tuned by our Team riders to work properly right out of the box.
- Made with premium materials for maximum performance in all situations.
- Handmade in British Columbia to the highest quality standards.
