2012 HOLIDAY COLLECTION

TECHNICAL FEATURES

OVERVIEW

UPPER ▼

Synthetics:

Unique layering of materials is used throughout the Osiris line. These layers of synthetics, leathers, rubbers and meshes are used to give our footwear maximum structural support, added comfort, greater durability and performance.

Unique Layering:

Synthetics materials are used throughout the entire Osiris line. The purpose of using synthetics is that they are more abrasion resistant, more stretch resistant and greatly reduce the overall weight of the shoe.

Lace Protection:

Several Osiris models feature alternative lace options, which allows for increased lace protection. In addition to added protection it also allows for a variety of lacing options for added comfort and performance.

T3 Technology

In an effort to help with toe impact, we have developed T3 Technology. T3 is a thin (5mm) PU (Poly Urethane) Foam or better known as Memory Foam that is sewn into the toe and vamp area, which adds an additional layer of protection. This process is added to the traditional construction of the toe and vamp area to improve fit, while increasing comfort and impact resistance. Select Osiris models feature our new T3 Technology.

OUTSOLES / MIDSOLE / INSOLE: ▼

Grip:

Osiris outsoles are tested during development to ensure the highest quality in performance and durability. Unique tread patterns are formed to maintain superb grip and board feel.

Flex:

Key flex grooves are inlayed into each Osiris outsole to guarantee quick break in, increased grip and ideal board feel.

MidSole PU / Air:

Polyurethane is a closed-cell injected molded foam. Since polyurethane is injected, it allows us to encapsulate our airbag system with the midsole material to ensure superior cushioning and added protection from high impacts.

Midsole EVA:

EVA (Ethylene Vinyl Acetate) is used for added cushioning and support in select Osiris outsoles. This allows for improved comfort and function.

RX Insole:

Dual density EVA (Ethylene Vinyl Acetate) is used for added cushioning and support in all Osiris insoles. This allows for improved fit and comfort.

OG Cush:

This OG Cush process is used on select Osiris styles. This construction replaces the traditional sockliner material with a thin EVA (Ethylene Vinyl Acetate) sheet, decreases weight while increasing comfort.

Skateboarding knows no borders or wars, color of skin or hate, rich or poor: Skateboarding unites and promotes a sense of identity and purpose, especially in the development of young people. In 2008 when we supported an initiative in Kabul, I came to realize once more how instrumental skateboarding is in overcoming differences in areas of conflict. After my first visit to Afghanistan, it was clear to me: I need to stay with it to achieve even more.

In January 2010, I established the Titus Dittmann Foundation. With the skate-aid initiative we utilize the power of skateboarding and our entire potential to bring hope on four wheels to young people, whether in Afghanistan, Africa or with the continuing work in Germany. Please help us . . . we rely on your support to achieve our goal and bring a share of happiness and security to children who have been deprived of their childhood.

A PERCENTAGE OF SALES IS DONATED TO SKATE-AID.

CANVAS

CREATING A NEW VISION AMONGST SURROUNDINGS
Limited Art Series

In a career spanning 27 years, **RISK** has impacted the evolution of graffiti as an art form in Los Angeles and worldwide. RISK gained major notoriety for his unique style and pushed the limits of graffiti further than any writer in L.A. had before: He was one of the first writers in Southern California to paint freight trains, and he pioneered writing on “heavens,” or freeway overpasses.

At the peak of his career he took graffiti from the streets and into the gallery with the launch of the Third Rail series of art shows, and later parlayed the name into the first authentic line of graffiti-inspired clothing.

JT

AULTZ

The newest pro skateboarder on the Osiris team, JT Aultz blended his daily style into his rider revolt shoe. Using font elements from his board sponsor Real, iconic black and red flannel colors for the inner lining and a black to the floor color scheme the shoe depicts all aspects of JT's persona.

OSIRIS

RONNIE

FAISST 

FMX dominator Ronnie Faisst fused his love of Asian culture in this NYC 83 collaboration. Inspired by his tattoos, the shoe incorporates Chinese characters, Samurai warriors and other traditional elements.

UPPER FEATURES

- * Action pebble grain, action leather and mesh upper material(s) for added durability & styling
- * Classic skate styling w/ reinforced high abrasion areas for superior durability
- * Light-weight padded tongue & collar for added comfort & support
- * Combination lacing system for improved fit & styling

OUTSOLE FEATURES

- * Vulcanized sole construction w/ traditional vulc wrap for maximum support & comfort
- * Soft molded dual density EVA insole w/ full latex covering for added durability & improved fit
- * Abrasion-resistant rubber outsole for wear, durability & ideal performance

tsb Tetron
Special
Blend

This high performance t-shirt helps you stay dry and comfortable with Tetron Super Blend fabric. It wicks sweat away from the skin to the fabric's surface, where it quickly evaporates. The fabric is also brushed for a soft feel against the skin.
