

LET'S GET TECHNICAL OSIRIS O

UPPER

Synthetics:

Unique layering of materials is used throughout the Osiris line. These layers of synthetics, leathers, rubbers and meshes are used to give our footwear maximum structural support, added comfort, greater durability and performance.

Unique Layering:

Synthetics materials are used throughout the entire Osiris line. The purpose of using synthetics is that they are more abrasion resistant, more stretch resistant and greatly reduce the overall weight of the shoe.

Lace Protection:

which allows for increased lace protection. In addition to added protection it also allows for a variety of lacing

OUTSOLES / MIDSOLE / INSOLE:

Grip:

Osiris outsoles are tested during development to ensure the highest quality in performance and durability. Unique tread patterns are formed to maintain superb grip and board feel.

Flex:

Key flex grooves are inlayed into each Osiris outsole to guarantee quick break in, increased grip and ideal board feel.

MidSole PU / Air:

Polyurethane is a closed-cell injected molded foam. Since polyurethane is injected, it allows us to encapsulate our airbag system with the midsole material to ensure superior cushioning and added protection from

Midsole EVA:

EVA (Ethylene Vinyl Acetate) is used for added cushioning and support in select Osiris outsoles. This allows for improved comfort and function.

RX Insole:

Duel density EVA (Ethylene Vinyl Acetate) is used for added cushioning and support in all Osiris insoles. This allows for improved fit and comfort.

OG Cush:

This strobel construction process is used on select tate) sheet, decreases weight while increasing comfort.

suede, mesh, and/or canvas upper material(s) for added durability & styling classic skate styling w/ reinforced high abrasion areas for superior durability light-weight padded tongue & collar for added comfort & support combination lacing system for improved fit & styling

OUTSOLE FEATURES

vulcanized sole construction w/ traditional vulc wrap for maximum support & comfort soft molded EVA insole w/ full latex covering for added durability & improved fit abrasion-resistant rubber outsole for wear, durability & ideal performance available sizes: men's
